

MAGNETIC BACKED ENGINEERED TIMBER OVERLAY

WOODCRAFT

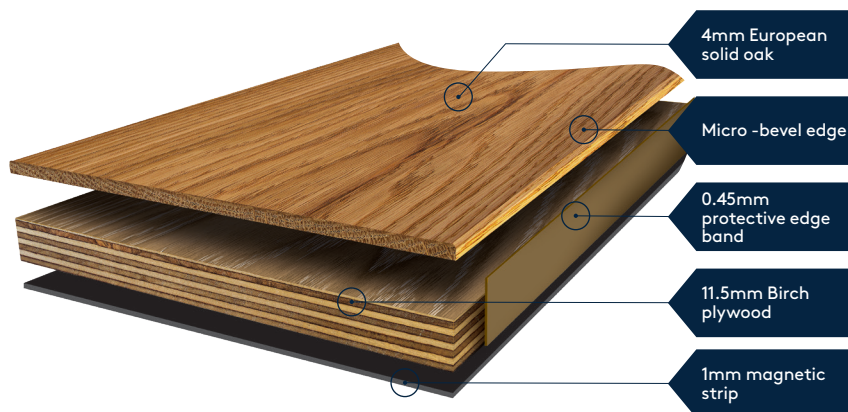

Premium Natural Wood Collection from Kingspan

Attiro®

Innovation by Kingspan

Innovation meets elegance, the beauty of Attiro is the simplicity with which you can create an engineered timber floor whilst retaining access to the underfloor void created. Attiro benefits from powerful magnetised strips that are bonded to the underside of the timber planks which in turn adhere to the steel encapsulated floor panels. With a genuine oak veneer available in a wide choice of finishes, you never have to compromise on style or function again.

Staves	
Thickness:	16.5mm Nominal
Widths:	160mm/180mm/200mm
Lengths:	1200 to 2200mm random lengths
Surface finish ⁺ :	Hard wax oil onto 'brushed' surface
Category:	Magnetic dry lay

Performance	
Slip resistance:	Dry: >60PTV Wet: >45PTV

Magnetic Performance	
Magnet type:	Isotropic Flexible Ferrite
Wi-Fi interference:	Tested and approved
Electrical equipment:	Tested and approved incl. pacemaker & telephony devices

Panel Fire Performance	
Reaction:	EN13501:1 Dfl-s1

System Sound Performance*		With barrier
Airborne Insulation Horizontal (Dnfw):	49 dB	53 dB
Impact Insulation Horizontal (Lnfw):	61 dB	59 dB

* Based on Attiro applied over low profile TLM26 access floor system
 § Warranty only valid when installed by an approved fitter on a Kingspan access floor system
 All genuine timber floor products (including Attiro) require a relative humidity level of 40% to 60% to be maintained throughout the building
 + 'Sawmill' and 'Rustic Hand Scraped' finishes are also available.

Sourced and manufactured in Italy in conjunction with selected trading partners

This product is certified FSC®
 FSC® ICILA-COC-002666

Raised access floor interface

Tolerance: 0.75mm maximum height difference between adjacent raised access floor panels.

Designed for use with Kingspan access floor systems.

Expansion Joints

8mm expansion joints every 15m width and every 35-45m in length. Colour matched 8mm factory formed silicone material. 8-10mm expansion to be included for all perimeter adjustments.

Design Assist

As part of the Attiro package we offer an industry leading bespoke Design Assist service. We engage at the beginning of the project and throughout the installation to mitigate cost variances, provide accuracy, predictability and efficiency and develop a layout plan to fully realise your vision.
